Research Policy

The goal of Yıldız Technical University is to strengthen its development as a free university that leads and competes at both the national and the international level, that contributes to the development of the country, that plays a part in solving the problems of the world, and that is innovative and proactive with the appropriate capabilities and competencies.

Within this framework, the research policy of our University is to attain the adopted goal through an approach that:

- Secures a competitive advantage at the international level centred on R&D, innovation and entrepreneurship;
- Attaches importance to national and international cooperation;
- Manages change through proactive approaches and encourages the growth of entrepreneurship;
- Converts the knowledge and technology it produces into products, systems or innovations and brings them to market;
- Contributes, through commercialisation and branded technology-intensive products, to our country attaining a high level of competitive strength on a global scale;
- Remains committed to the principle of sustainability throughout its R&D activities.
