Distance Education Policy

Within the framework of the principles of "lifelong education" and "equal opportunity", Yıldız Technical University aims to deliver educational services in national and international geographies by using distance education technologies, and to attain the goals it has set by putting in place the infrastructure that supports this.

Within this framework, the distance education policy adopted by the senior management of our University is to attain the adopted goal through an approach that:

- Conducts activities directed towards the development of society;
- Designs educational programmes appropriate to needs;
- Draws on the accumulated body of knowledge in education, science, technology and the arts and makes use of developing technology;
- Uses high-quality, up-to-date and innovative technological resources effectively and efficiently;
- Puts in place the technological and information technology infrastructure;
- Supports teaching environments and tools with new approaches and methods;
- Continuously improves learning programmes in both quality and quantity, in coordination with formal on-campus education;
- Monitors the quality of distance education by means of accurate measurement instruments;
- Uses technologies in a manner that ensures the continuity of education and training during pandemic periods;
- Sets out to match the quality of formal education in achievement and creativity.
